Payment Terms and Conditions

Orchid seed germination - Mother flasking payment must be sent with seed. 50% final flask deposit due before 2nd replate. Final payment is due upon delivery/pick up of flasks.

All fees are subject to change.

Shipping/Packaging/Handling Charges

The client and Orchids for the People will mutually agree upon shipping method. The client will pay shipping/delivery/packaging charges.

Seed/Pod Shipment & Identification

All new clients must contact OFTP before shipping seed material. Clearly identify each pod/seed packet with genus and parentage information and the maximum number of flask replates that you would like. (Each replate flask will be sown with 35 seedlings). Package all pods separately in a paper packet or envelope folded securely. Also, please waive any signature required to receive your pods.

OFTP shipping preference to receive seed is USPS Priority Mail.

Because of so many breeding variables we cannot guarantee germination for any seed. Every possible effort is made to successfully process your seed however, contamination can occur at any point of the laboratory process.

Orchid Flasking Services

Absolutely Unique

Quarterly West-Coast Hand Deliveries

We offer scheduled hand delivery to the Portland, San Francisco and Sacramento metro areas! No more jumbled flasks arriving in the mail. This will allow you to acclimate your flasks in their new space instead of rushing to get them out of their destroyed flask. Other West Coast deliveries may be available. Pricing varies.

Confidentiality

Complete confidentiality and control over your proprietary plant material. Any plant material left over after your order is completed will be destroyed immediately.

Real-Time Info & Updates

All information on the status of your orders will be available online, 24hrs a day. It is updated in real time, allowing you to see how your orders are preceding and anticipated delivery dates.

Highest Quality Finished Flasks

We use polypropylene 'deli' containers for all our flasks, ensuring an easy and gentle deflasking process. No more broken bottles and shards of glass. All final flasks are planted with 35 plants so you receive at least 30 plants per flask. We strive for size uniformity and adequate spacing to alleviate deflasking stresses on the plants.

Our Story

After years of sending our orchid seeds to labs and dealing with lack of communication, quality issues and closures, we decided to put our formal educations to work and build our own facility.

We started from the ground up and constructed a lab for birthing orchids! Airtight, climate controlled, HEPA filtered, positive pressure environment for the lowest possible risk of contamination.

We are using state of the art LED lighting to not only ensure a quality growing environment for your plants, but to reduce our carbon footprint and keep our business green!

We have been sowing our own seeds and those of a limited clientele for two years with great success and are now accepting new clients.

Orchids for the People

"Catering to the curious and long-time addict."

We Bring Beauty

As a grower, I am very familiar with the trials and tribulations of dealing with a propagation lab. The process and products of our lab directly stem from my frustrations as a client and observing the best practices of great propagation labs.
